What have we been learning?

Week beginning: Monday 22nd June 2026

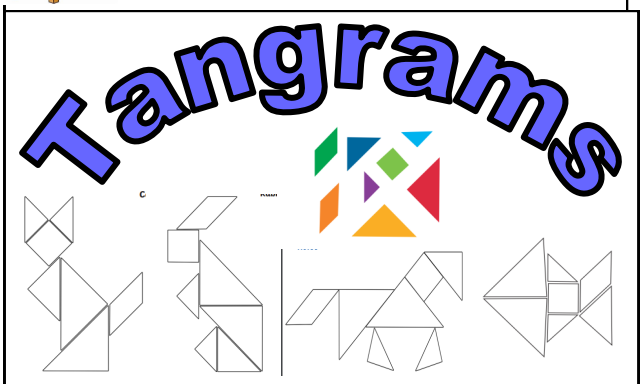

We have been learning our letters and sounds in our phonics lessons. This week in phonics we have been counting syllables in words. We first started with our names. Then we looked at other words. We found there were many words with two syllables. Clapping the syllables helped us to read longer words.

Which word below is the odd one out?

table picnic hill bedroom

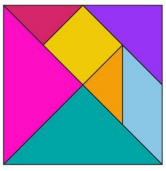

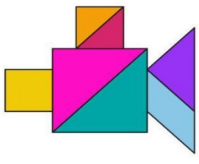

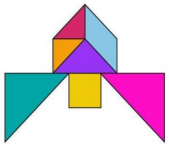

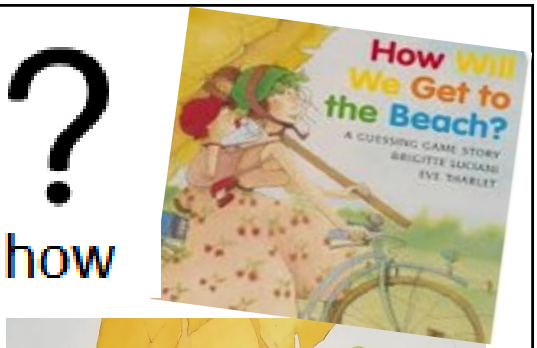

In Reception class. We have been learning about Tangrams.

A Tangram is a square divided into 7 different shapes. These 7 shapes have been turned and arranged to make different pictures. Above we can see a cat. What other animals have the shapes been arranged to make?

We have enjoyed moving shapes in different positions and turning shapes in different directions to make pictures. We now know that the word rotate means turn.

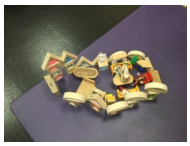

We have been sequencing the story How will we get to the beach?

We had to order the pictures from the beginning to the end remembering which way Roxanne choose to travel next. Along the way Roxanne had some problems. In our 'talk partners' we thought of our own experiences of travelling and what would help Roxanne solve her problem.

Don't let a little worry turn into a big one...

If you or your child are worried about something or have any questions, please phone the school office and book an appointment to see myself (Ms Boakye), Mr Withers or Mrs O'Reilly.

We are always really pleased to meet with you and chat things through.

How can you help your child with their learning?

How many of the Tangram 2D shapes around you can you see? Name them. In which direction or position have they been placed? How are they the same or different?
